Dear Childcare Center Owner/Director,

This letter has been brought to you by a concerned parent whose child attends your school. Because of the hyper awareness of infections caused by the pandemic, parents and most people are understandably concerned about acquiring any infections. Sterile Space Infections Defense LLC a.k.a. **THE GERM POLICE**, can make your school a **Healthy Child Zone® Program** protected school, which goes far beyond the scope of what a traditional cleaning company can do. What does this mean?

- Total deep decontamination of furniture, fixtures, surfaces and toys. Like-new cleanliness.
- Terminal, medical-grade disinfection of all high frequency touch points.
- Antimicrobial coating of all items including every last Duplo, Lego, dinosaur, Matchbox car, doll, action figure, toy, stuffed animal, etc., which means any newly deposited invasive microbes will be severely damaged, thus inhibiting their ability to colonize your surfaces.
- Signage and other materials to help you with marketing and explaining to parents the steps that were taken by you for the safety of their children.

What could fewer germs in your environment mean to you, your staff, students and their families?

The **Healthy Child Zone® Program** is a once per year treatment service that can protect your surfaces 224/7/365 from rampant invasive microbial colonization. Fewer germs surviving on surfaces means fewer germs to cause problems. It's also very affordable.

If you want the peace of mind that comes from knowing you've done everything you can to make your school a healthier place to work and learn, then give us a call today for a free surface microbial audit test to know how clean (or not) your surfaces are at the moment and a proposal.

Sincerely,

Irwin Stromeier, Owner, Sterile Space Infection Defense LLC
